What is the Missouri Home Visiting Referral System's CRIS Link?

The Missouri Home Visiting Referral System is a one-stop shop for anyone to make a referral for home visiting services (**prenatal to five**) in Missouri using the CRIS Link. The CRIS Link connects users to one of five regional referral networks — called a Coordinated Referral & Intake System (CRIS) — to submit a referral.

Each CRIS network is led by a collective impact site that manages participating home visiting programs and models within its region.

What are the benefits?

- It's FREE & EASY to use
- Easy to turn off referrals to manage capacity
- Matches families with programs that best meet their needs & location
- Can supplemental other referral sources
- No need to remember:
 - Coverage areas
 - Eligibility criteria
 - Capacity to serve

How does it work?

Anyone can make a referral using the CRIS Link:

- ✓ Go to ctf4kids.org/crislink
- ✓ Select the family's county to find out who the CRIS Coordinator is in their region
- ✓ Click to **"learn more & begin referral"**
- ✓ Submit an online form through the Regional CRIS Network's referral page

Once the referral is submitted, the Regional CRIS assigns the family to a home visiting program based on the family's needs and eligibility, and the program's capacity.

The assigned home visiting agency then contacts the family to tell them more about their program and offer services.

Ready to join or make a referral?

Use the CRIS Link make a referral or connect to your Regional CRIS Network's Coordinator. Scan the QR code to get started today!
